Short description of the school/organisation:	The history of "Altes Gymnasium Leoben" dates back to 1620. Today, we are a public (lower and upper) secondary school with Erasmus+ accreditation, specialising in science, music, languages and information and communications technology. We are proud of our very own school musical, which is staged at the historic "Stadttheater Leoben", as well as our active climate club and bee keeping program. Approx. 700 students and 70 teachers.
Environment of the school/organisation (rural/city area, social class):	Leoben is a former mining city located in the province of Styria and home to 25.000 inhabitants. It combines the benefits of city life surrounded by lovely countryside with its central location in Styria. It is gateway to the Upper Styrian mountains, situated on the river Mur and only 50 minutes from Graz. As a university town, Leoben describes itself as an innovative backdrop for business, training and education. A wide variety of schools with different specialisations, a charming old town and vibrant cultural scene offer many opportunities to experience the Austrian lifestyle. www.leoben.at/en

Desired Region/City:	PACA, Occitane
Please describe your intentions/plans in a few words:	<p>Ideally, we are looking for a partner school for smaller group mobilities and individual long term student mobilities (one month). In terms of a timeline, we are planning a small student group mobility with four to five contact days in the 2027 spring semester. We also have two excellent students, who would like to stay on for a month after the group mobility.</p> <p>We are interested in an exchange, if our French colleagues would like to organize mobilities to Austria. For the group mobility we would also be open to stay at a youth hostel or hotel, in case host families are not a possibility.</p>
Approximate Duration:	Four to five contact days (group), 30 contact days (individual student long term mobility)
Purpose/Goal of the visit:	<p>We are looking to initiate a strong partnership between our schools, supporting the European dimension of teaching and learning. Our goal is to foster mutual understanding, inclusion, tolerance, democratic participation and the quality of language learning. We hope to develop new professional and educational networks across Europe and the knowledge of our common European cultural and natural environment. Our school has a very active climate club and a strong interest in sustainability, which could be another interesting topic to work on together.</p>
