

A witch's meal

There are 4 witches at the meal.

They eat fungus, spiders, lizard's

There are 10 little girl's eyes.

Each witch eat 1 little girl's eyes.

How many little girl's eyes don't eat the witches ?

Each witch eats 3 lizard's tails.

How many lizard's tails eat the witches ?

Solution :

$10 - 4 = 6$ ten minus four equals six

The witches don't eat 6 little girl's eyes.

$3 \times 4 = 12$ three times four equals 12

The witches eat 12 lizard's tails.
