

Confinement is not very nice

Tired of being inside

Rather than feeling blue

I prefer stay busy, to keep going, to learn something new

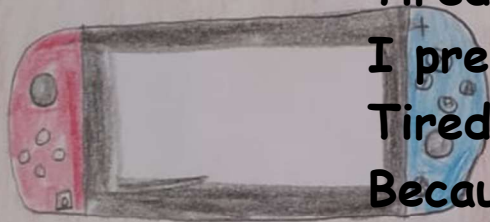

Tired of board games and TV series to view

I prefer cooking and sports to get myself through

Tired of being indoctrinated by all the news

Because all of the warnings we're already used to

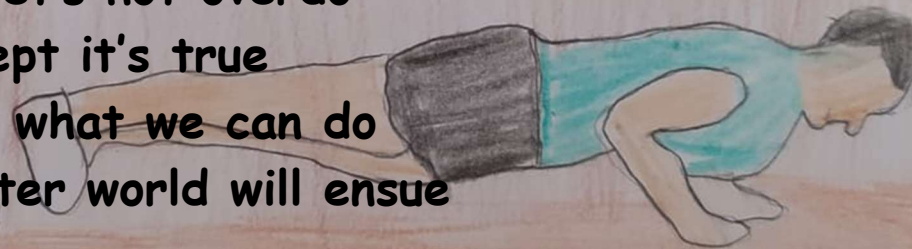

Prevention is good but let's not overdo

After all, we must accept it's true

To have restrictions on what we can do

In the hope that a better world will ensue

Long live solidarity, we must pursue

Helping each other, it's me and you.
